About UVALLI Web Development Project

The UVALLI Web Development Project is a small organisation, who aims to improve the Web through the use of free software and applications. It is a member of the VALLI International Group (<http://www.valli.go.to>) and shares in its ethos of working for a better tomorrow.

The UVALLI Web Development Project was launched on the 8th April 2012, and since then has developed a number of applications and software which are available to download for free. As well as applications and software, the UVALLI Web Development Project also develops Mobile Web Apps. For more information, as well as more applications and software visit <http://www.uvalli.co.nr>

About GCSE Science Quiz/ C4 Revision Quiz

The GCSE Science Quiz is a project which aims to produce revision quizzes which will test students. The C4 Revision Quiz is one of these quizzes and is also the first. The Current **Version 2.0.0.0** (Accurate: 8th August 2012) is an update of the C4 Chemistry Quiz. The Current Version was re-made from scratch following a number of bugs, and errors in previous versions.

Version 2.0.0.0 has a much fresher and cleaner look, as well as new innovations which give the application a better overall experience.

Download:

The GCSE Science Quiz/ C4 Chemistry Quiz can be downloaded for free via the UVALLI Web Development Project Website (<http://www.uvalli.co.nr>). The Download link can be found below.

The Application is available in two file types. They are:

1. “.zip”
2. “.torrent”

Both will give you the same file. ‘.zip’ is a compressed file which requires extraction. This can be done via JZip (<http://www.jzip.com>) **Requires Installation*. The second file type shown above is ‘.torrent’. This will require a Bit Torrent Client. We recommend uTorrent (<http://www.utorrent.com>).

We recommend that you save the downloaded file to the desktop, for quick access and ease of use.

Download Link: <http://uvalli.weebly.com/gcse-science-project.html>

Installation:

1. Click on setup in downloaded file.
2. Follow the On-Screen Instructions.
3. Once Installation is complete, Restart Computer

The Set-up file may look similar to this.

Note: The GCSE Science Quiz/ C4 Chemistry Quiz require other software to be installed. This is done during the Installation. The Application requires these Applications to be installed to function properly. The Software/Applications are common among windows computers and most of time is pre-installed. These Software/Applications are from Microsoft’s website. They include:

- Windows Installer 3.1
- Microsoft.NET Framework 4
- Microsoft.NET Framework 4 Client Profile
- Microsoft Visual Basic Powerpacks 10.0

Start-up

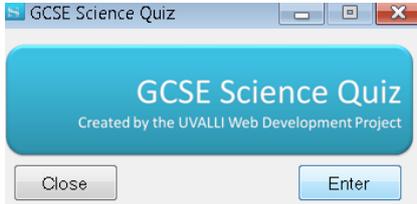

An icon should now be on your desktop, which looks similar to the on shown below. Click on this Icon. **If not, see troubleshooting*

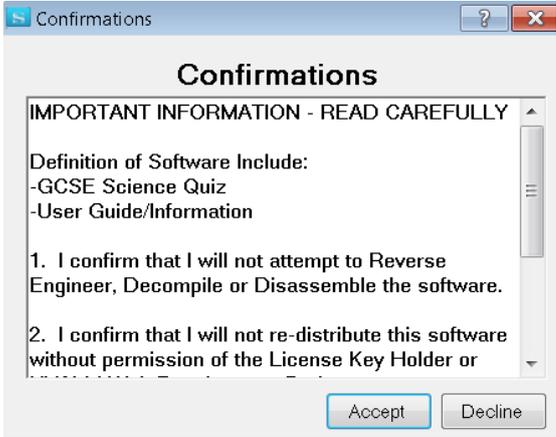

A Splash Screen should now appear. It should look similar to the one shown below
**If not, see troubleshooting*

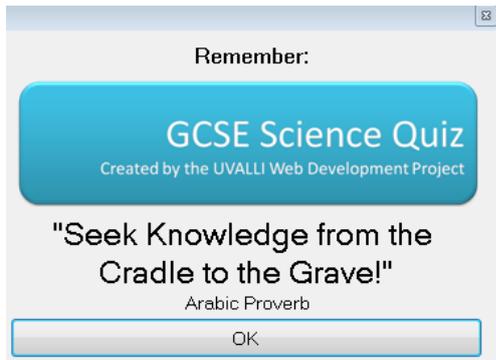

A box should now appear, like the one shown below. Press Enter.

A Confirmations box, like the one shown below should now appear. To use the Application, you must agree to all the confirmations. The confirmations wording may vary between applications, depending on their need, however the principle would be the same.

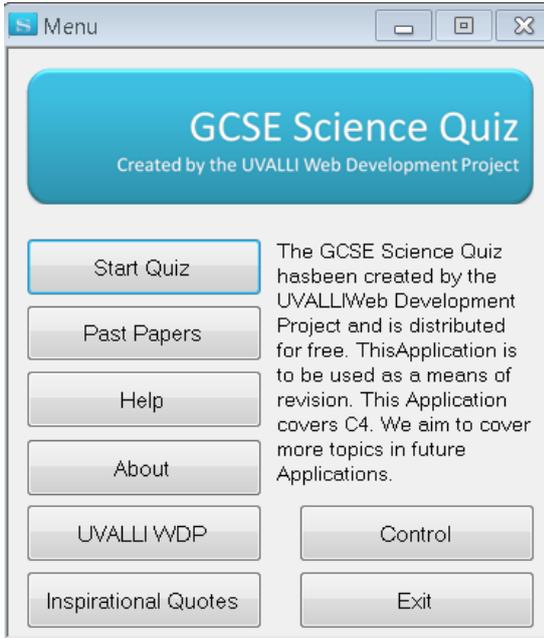

A quote/proverb of inspiration will then appear. Press OK.

Then the Menu and Control Box will appear.

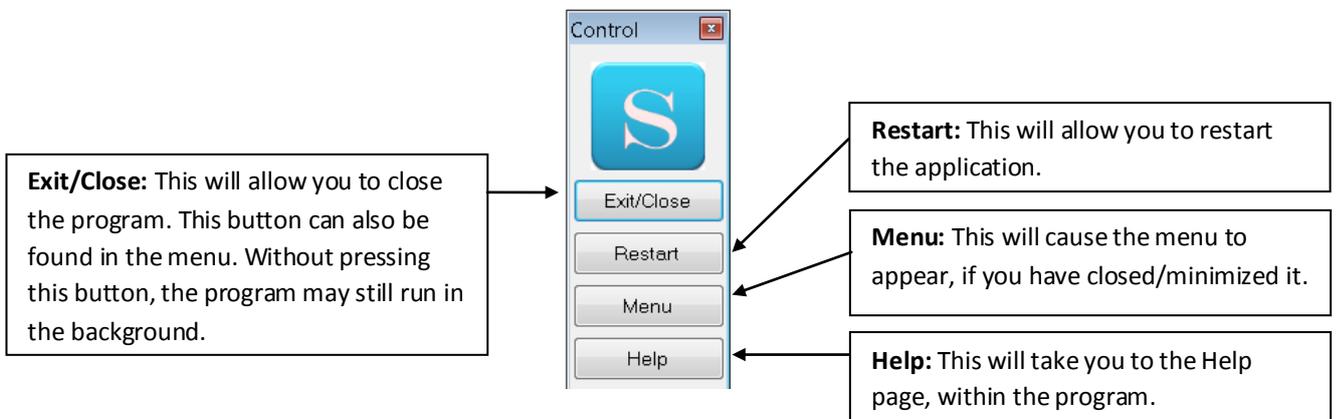

Menu

The Menu may look different; however the principles are the same. From the menu, you can access all the material, as well as a simple help page.

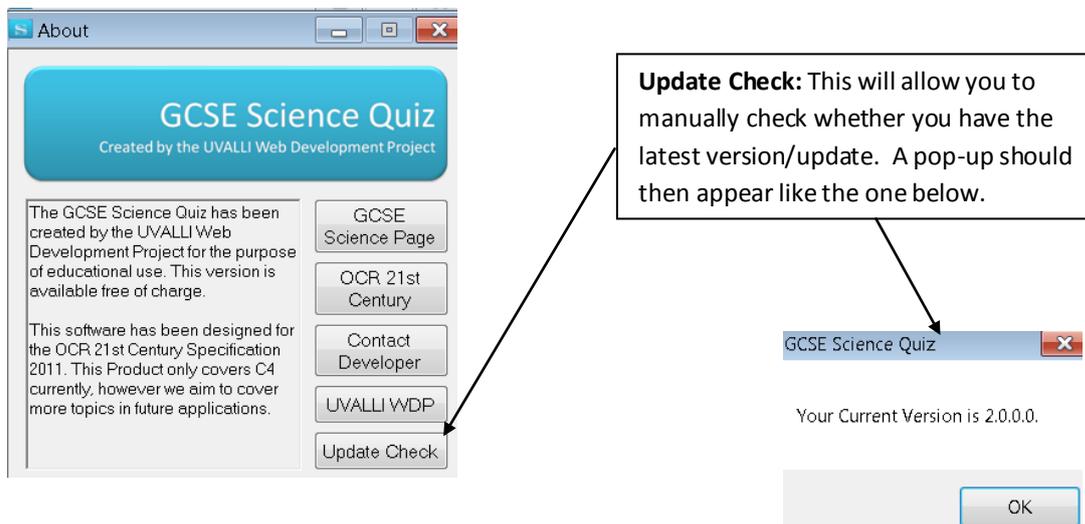

Control Box:

The Control Box should look similar to the one shown in the picture. It should appear in the corner of your screen. If it is not there, click control in the menu and it should appear. This may also appear as Control Box.

Update Assistance

This product does not update automatically. However, an Update button can be found in the menu, which will transfer you to the Download page of the current version. You can see your version number when you press the Update Checker button. This can be found in the About page.

Contact Us:

To Contact us Visit our Website (<http://www.uvalli.co.nr>) or alternatively, visit our VALLI Connect Page. (<http://valliconnect.weebly.com/uvalli-web-development-project.html>)

The UVALLI Web Development Project uses VALLI Connect. This is due to a simplified for system. None of your information will be passed on to third party sources and will not be kept longer than needed.

You can also contact us via our Twitter Page (<http://twitter.com/UVALLIWDP>)

If you prefer, you can also email us at uvalli@post.com, however we would prefer if you used our VALLI Connect Page, as it is easier for us to deal with and process your email.

Troubleshooting:

Page Number	
7	Icon/Splash Screen has not appeared
7	The Application is not responding
8	Page says 'Internet Connection is Required'
8	I am not a Windows Operating System User
8	Other Programs are being Installed during Program Installation

Icon/ Splash Screen has not appeared:

1. Install/Re-Install the Application
 - a. See Installation.
2. Restart Your Computer
3. Re-download, and re-install.
 - a. See Downloading

If the Icon/Splash Screen appears after either step, then you're sorted and there is no need for you to continue with the other steps.

Application Not Responding

1. Ctrl, Shift, Delete
 - a. Press Ctrl, Shift, and Delete on your keyboard simultaneously.
 - b. Press Task Manager.
 - c. Right Click the name of the application.
 - d. Click close.
2. Restart Computer
3. If the problem continues to happen on a regular basis, re-install the application.
 - a. If your computer is old, the problem may be old hardware. Google Search 'Speed up slow computer'.

A Page Says 'Internet Connection is required'

Some of the content in this program requires an internet connection. Unless you are connected to the internet, you will not be able to see this content. We cannot assist you if you are having trouble with your internet connection, however most of the content can still be accessed offline.

I am not a Windows Operating System User

This program was designed for use on a Windows Operating System. However some programs such as Wine (<http://www.winehq.com>) and CodeWeavers (<http://www.codeweavers.com/>) allow Windows Programs to run on Linux and Mac. However, the UVALLI Team have not tested these and do not take responsibility of any problems that may arise due to this.

Other Programs are being installed during Program Installation:

The GCSE Science Quiz/ C4 Chemistry Quiz require other software to be installed. This is done during the Installation. The Application requires these Applications to be installed to function properly. The Software/Applications are common among windows computers and most of time is pre-installed. These Software/Applications are from Microsoft's website. They include:

- Windows Installer 3.1
 - Microsoft.NET Framework 4
 - Microsoft.NET Framework 4 Client Profile
 - Microsoft Visual Basic Powerpacks 10.0
-
